DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Regarding claims 1 and 8, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

4. Claims 1-6 and 8-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Petteruti et al. (5,503,483).

With respect to Claims 1 and 8, as best these claim can be understood, Petteruti teaches the sales receipt (receipt) in column 4, lines 42-44, the placing, forming,

merging and printing steps in column 9, lines 7-53. It is noted that Claims 1 and 8 recite circle about an item and watermark. However, Petteruti teaches in column 9, lines 27-29 that the graphic may be bar codes, graphics (logos), text or lines. Given this teaching, Applicant has made an obvious selection of a known graphic known to those of ordinary skill in the art based on Petteruti's disclosure. With respect to Claims 2-6 and 9-14, these claims recite various types of graphics. The specific indicia printed is not patentable given the teaching of Petteruti that any graphical information may be printed in Column 9, lines 27-29. With respect to Claim 7, Petteruti teaches all the claim limitations except that the graphic is a strike through design. However, Petteruti teaches that the design may be any graphic in column 9, lines 27-29. One of ordinary skill in the art with the technique of Petteruti in hand would have been motivated to modify the graphics of Petteruti to suit his or her needs.
